

the world's leading high technology wood

supplied by

welcome to the future of wood

Imagine a solid wood that is sourced from fast-growing sustainable forests, has zero toxicity and provides dimensional stability and durability that exceeds even the best tropical hardwoods. Imagine a wood that can replace increasingly scarce tropical hardwoods, treated woods and less sustainable materials in new and existing outdoor applications. Imagine a wood that will act as a better carbon sink during its extended life span and can be safely recycled at the end. Such a wood exists. It is Accoya®: the world's leading high technology wood.

the performance benefits

DIMENSIONAL STABILITY

INSECT BARRIER

NON-TOXIC

CLASS 1 DURABILITY

MACHINABILITY

100% RECYCLABLE

LONG LASTING

CONSISTENT QUALITY THROUGHOUT

PERFECT FOR COATING

RETAINED STRENGTH & HARDNESS

FROM SUSTAINABLE SOURCES

UV RESISTANT

natural science

Spanning eight decades of research, Accoya® wood combines past and present scientific wood acetylation study with a proprietary production process to deliver reliable commercial-scale results. The acetylation process used with Accoya® is entirely non-toxic and introduces no chemicals not already found in the wood. In producing Accoya® wood, the chemical structure of the wood is modified from the surface to the core with molecular uniformity throughout—providing outstanding performance.

Accoya® wood is set to become the material of choice for exterior applications and can be used for virtually anything, from windows to doors, decking to siding and even for applications which were once only feasible with non-sustainable materials.

Accoya® wood is continually sampled for consistent, measurable modification quality from the surface to the core.

tried and tested

Accoya® wood has been tested over prolonged periods in all types of weathering conditions – above ground, below ground and even in water – and has been proven to withstand the toughest of external environments. Exceptional durability and dimensional stability of Accoya® wood requires significantly less maintenance, meaning paints and stains stay where they belong: on the wood. In fact, tests results between Accoya® wood and regular wood constantly prove coating adhesion lasts up to 3 times as long on Accoya® wood.

Siding & façades

Accoya® wood is suitable for siding and façades and is the ideal choice where aesthetics and less frequent maintenance are critical. The dimensional stability, durability and natural UV resistance of Accoya® wood confirms a decreased overall life cycle cost.

Decking

In specifying decking, natural beauty, strength and all-weather performance are important. A lasting wood with outstanding performance characteristics and dimensional stability is desirable. It is also crucial that the wood is non-toxic and therefore safe for people and pets. Accoya® wood meets these requirements.

Window frames, doors & shutters

Accoya® wood has low thermal conductivity and is more durable and dimensionally stable than other woods. This means windows do not swell closed, doors continually open freely and shutters maintain their authentic beauty. Accoya® wood may be opaque, translucent or transparent coated, and its lower maintenance requirements increase its cost effectiveness.

Outdoor furniture & equipment

Accoya® wood is perfect for tables, chairs, tree houses, play sets, planters and landscaping timbers because it is non-toxic and able to withstand the rigors of different weather conditions

imagination unlimited

Accoya® wood's outstanding performance is inspiring creativity on many levels. Imagine it used for musical instruments, water sculptures, signage, veneers... In fact, wherever you can imagine wood, imagine Accoya® wood.

Upper Canada Forest Products - UCS Forest Group company

Upper Canada Forest Products is Canada's premier distributor of specialty products serving discerning customers in the architectural woodworking industry. Upper Canada Forest Products offers a comprehensive selection of exquisite hardwoods and softwoods, as well as a full line of panel products including MDF, particleboard, melamine, veneer and hardwood plywood.

Upper Canada Forest Products' is a FSC certified chain of custody supplier and further demonstrates a commitment to sustainability by selecting Accoya® wood as the world's leading high technology wood. Extraordinary people, unique supplier relationships and customer-focused technologies combine with a state of the art warehouses to provide an unparalleled level of service in the industry. Upper Canada Forest Products is dedicated to adding value to your business, and is committed to "Delivering the Difference" to its customers and suppliers every day.
