

Element Veneer Collection

Element Veneers offer consistent color, unique grain patterns and contemporary designs.

- Oversized 10' lengths are available
- Cross grain veneer and panels available in both 8' x 4' and 10' x 4' sizes
- Matching edgebanding in 2 thicknesses: 0.5 mm and 2.0 mm
- Good 2 Sides on MDF 4' x 8' stocked
- Core options: TSCA VI Compliant PB, MDF, MDX, FSC® Certified upon request
- No minimum quantities

Element Veneer saves rare and exotic trees for future generations.

Defect-free panels offer minimal waste and maximum yield.

STOCKING PROGRAM

Charcoal Ash UC3004

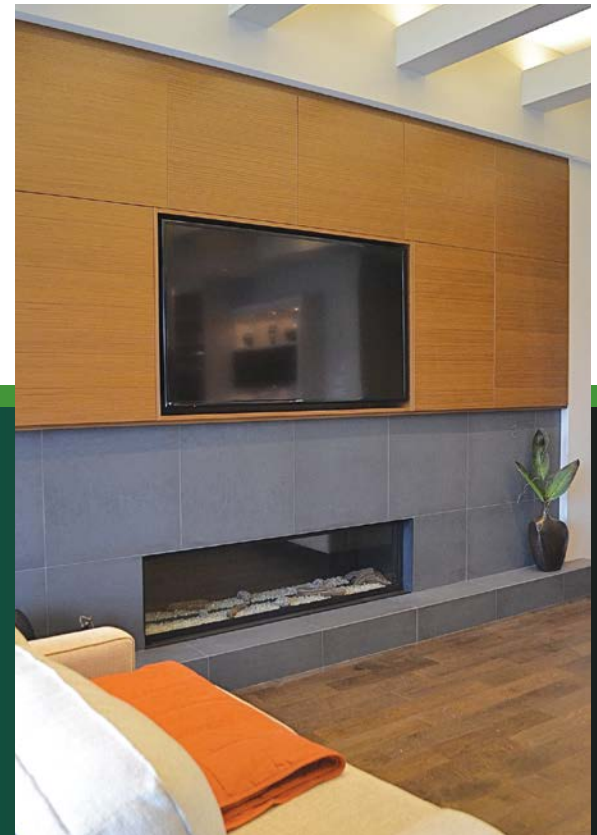

Driftwood UC3010

White Oak Rift UC3008

Teak Quartered UC3013

Element Veneer
Collection

Silver Elm UC3006

Coastal VG Fir UC3000

European Oak UC3012

Black Oak UC3011

Frosted Oak UC3001

Claro Walnut UC3007

Walnut Quartered UC3002

Wenge Quartered UC3009

Platinum Wenge UC3003

What is Element Veneer?

- Also known as “engineered”, “composite” or “reconstituted” veneer
- Real wood re-engineered to look like other wood species
- Uses fast growing sustainably managed species: Obeche (similar to Poplar) and Basswood
- An environmentally responsible alternative to using rare and exotic wood species
- Available as certified by the Forest Stewardship Council® (FSC)

Why Element Veneer?

- Offers the most contemporary designs sought after today
- Consistent color and grain patterns
- FSC® Certified available
- Uses TSCA VI compliant cores of MDX, MDF and PB
- Available for immediate shipment

Leadership in Energy and Environmental Design LEED Contribution

- All Element Veneer can be ordered as FSC® Certified (LEED Credit MR 7)
- Substrate options can include panels made with 100% post industrial recycled content and No-Added Urea Formaldehyde adhesives (LEED Credits MR 4.1 + 4.2)
- Element Veneer can be composed and laid up within your local region (LEED Credit MR 5.1 + 5.2)

Installation and Finishing Tips

- Contact cement can only be used with Element Veneer that has a phenolic backer or other backers that are approved for use with contact cement.
- Element Veneer is like all wood veneers, it will fade or change color with exposure to a strong light source, a UV inhibiting finish is necessary to slow down fading or color change.

ELEMENT VENEER SPECIFICATIONS

Name: Element Veneer
Panel Size: 4' x 8' and 4' x 10' available
Thickness: 0.5mm or .02"
Backing: Paper back or raw
Edgetape: Matching 0.5mm and 2mm in stock
Certification: FSC® Certified

Custom Lay-up Available

Lead Times: Allow 1–2 weeks
Grain Options: 4' x 8', 8' x 4', 4' x 10', 10' x 4'
Grain Cut: Straight grain, Rift cut

Color Options:

Charcoal Ash	UC3004	White Oak Rift	UC3008
Driftwood	UC3010	Teak Quartered	UC3013
Silver Elm	UC3006	Claro Walnut	UC3007
Coastal VG Fir	UC3000	Walnut Quartered	UC3002
European Oak	UC3012	Wenge Quartered	UC3009
Black Oak	UC3011	Platinum Wenge	UC3003
Frosted Oak	UC3001		

Cores: MDF, PB, MDX
Thickness: 5.2mm to 1 1/2"
Certification of Core: TSCA VI, FSC® Mix Credit, NAF, NAUF or ULEF (Varies by cores selected)

Element Veneer Specification Usage and Specification Guide:

- 1) Element Veneer is made from real wood and should be treated and processed as you would other real wood products.
- 2) Finishes with an appropriately tested, high-quality UV inhibitor are highly recommended.
- 3) Backer/Substrate is required and can include medium density fibreboard (MDF), particleboard (PB), cross banded MDF (MDX) and veneer quality plywood.
- 4) When bonding Element Veneer to a substrate please follow the directions of the adhesive manufacturer.

Laid-up panels are available directly from Sierra.
- 5) FSC® is available upon request.
